Visit at Alhambra and Generalife

### Characteristics:

Towering the city is the Alhambra, a XIII century Muslim fortress and residence of kings, princes, warriors and beautiful maidens that gives magic and mystery to the hill on which the Alhambra stands upon.

With no doubt, this is a major focal point of both touristic and cultural attractions of the spanish historical heritage. The beauty of its magnificent halls, arches and fountains harmonize and idealize the stay of travelers.

Wander through the Alcazaba, the first home of the monarchs, The Nasrid Palaces, considered as the true essence of the complex, and the Generalife, with beautiful gardens where color and water are the protagonists.
